MARKET ANALYSIS

ETHEREUM/USD

Risk Disclaimer

Risk Disclosure

DISCLAIMER: Financial Trading of any kind whether it be FX, Commodities, Futures, Stocks and Options trading or any Derivative trading involves substantial risk of loss and is not suitable for every investor. The valuation of futures, stocks and options may fluctuate, and, as a result, with some brokers, clients may lose more than their original investment. The highly leveraged nature of futures trading can mean that small market movements could have a great impact on your trading account and this can work against you, leading to large losses or can work for you, leading to large gains.

If the market moves against you, you may sustain a total loss greater than the amount you deposited into your account. You are responsible for all the risks and financial resources you use and for the chosen trading system. You should not engage in trading unless you fully understand the nature of the transactions you are entering into and the extent of your exposure to loss. If you do not fully understand these risks you must seek independent advice from your financial advisor.

All trading strategies are used at your own risk.

Any content published on discreettraderpro.com should not be relied upon as advice or construed as providing recommendations of any kind. It is your responsibility to confirm and decide which trades to make. Trade only with risk capital; that is, trade with money that, if lost, will not adversely impact your lifestyle and your ability to meet your financial obligations. Past results are no indication of future performance. In no event should the content of this correspondence be construed as an express or implied promise or guarantee.

discreettraderpro.com is not responsible for any losses incurred as a result of using any of our trading strategies. Loss-limiting strategies such as stop loss orders may not be effective because market conditions or technological issues may make it impossible to execute such orders. Likewise, strategies using combinations of options and/or futures positions such as "spread" or "straddle" trades may be just as risky as simple long and short positions. Information provided in this correspondence is intended solely for informational purposes and is obtained from sources believed to be reliable. Information is in no way guaranteed. No guarantee of any kind is implied or possible where projections of future conditions are attempted.

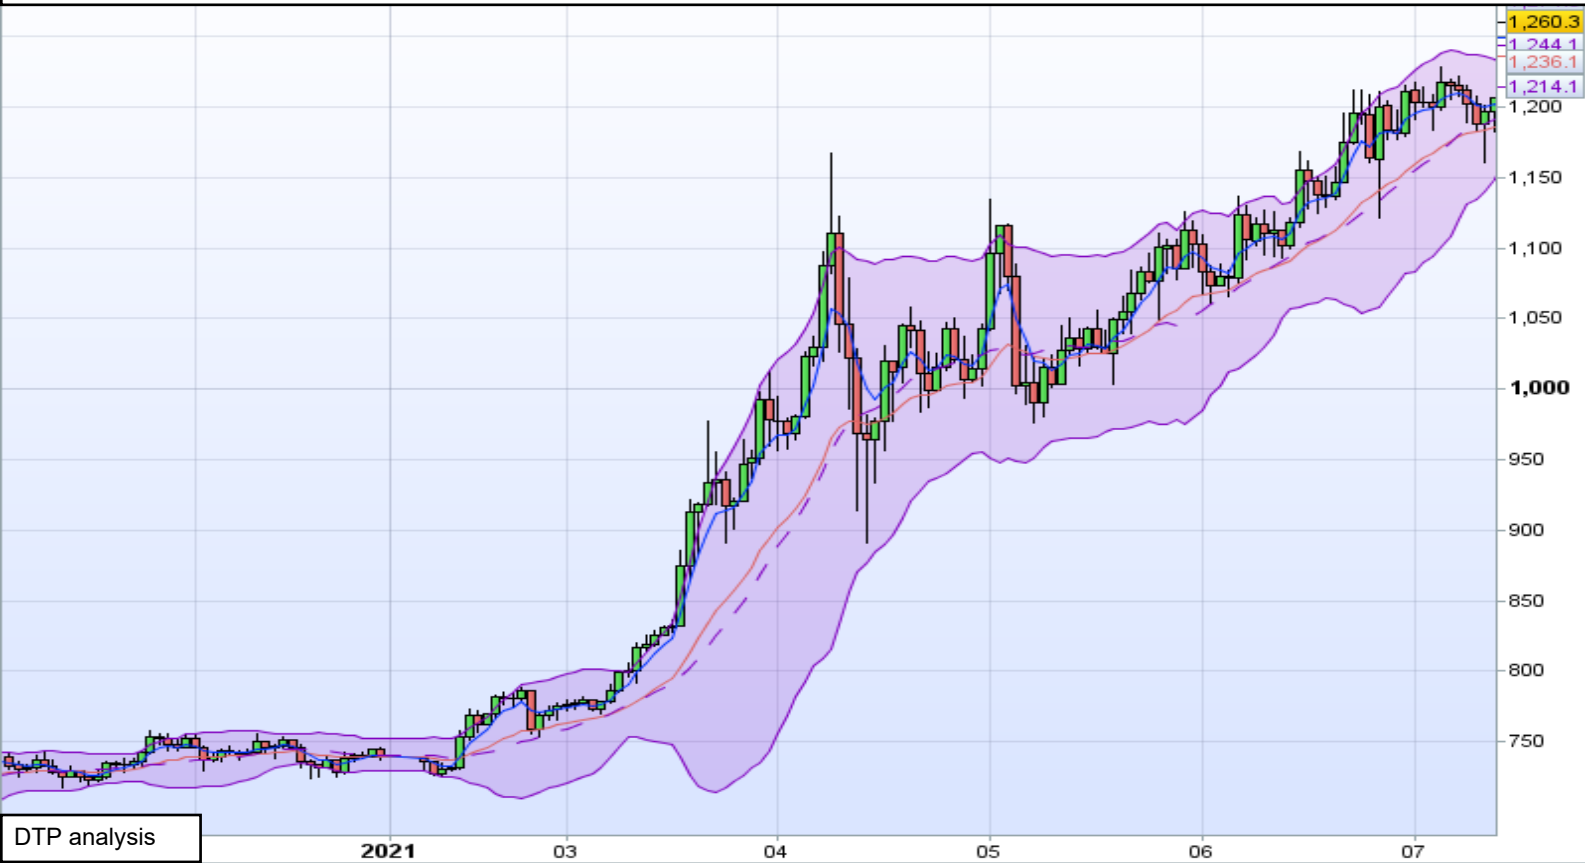

Disclaimer
